

Orange juice with a Papaya straw?

This and much more as India's most innovative social start-ups compete at the

Tata Social Enterprise Challenge 2020

Greenikk from Kerala and Aerobiosys from Telengana Joint 2nd Runners-up

Greenikk produces 100% bio-degradable straws using stalks of the Papaya plant. Aerobiosys developed a cost-effective, intelligent, AI and IoT-enabled ventilation system for patients with respiratory illness.

Trestle Labs from Gujarat Winner

Trestle Labs is a technology start-up which invented KIBO, the world's first intelligent personalised reading-learning companion for the visually-impaired and learning-disabled.

PadCare Labs from Maharashtra 1st Runner-up

PadCare Labs developed a decentralised, portable, instant washroom fit-able sanitary napkin disposal unit.
